

Vanguard in a Nutshell

Mexico Edition

Our core purpose: To take a stand for all investors, to treat them fairly, and to give them the best chance for investment success

A different kind of investment firm

Vanguard is an investment company not quite like any other. Vanguard was founded in the United States in 1975 on a simple but revolutionary idea: that an investment company should manage the funds it offers in the sole interest of its clients. In 1976, Vanguard pioneered the concept of indexing, introducing the first index fund for individual investors in the United States.

Our approach has earned us the trust of millions of investors and allowed us to become one of the world's largest investment management companies, with a presence in Europe, Australia, and Asia as well as the Americas.

A unique ownership structure

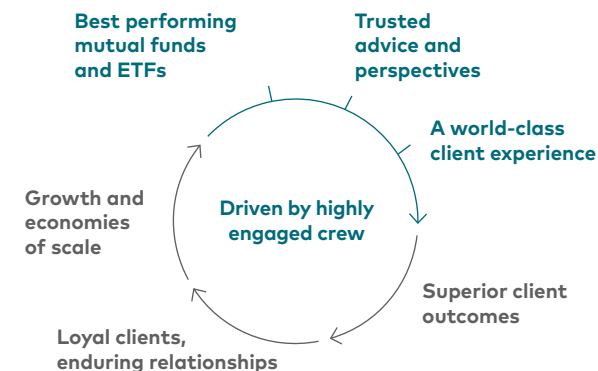

Our client-focused approach is anchored in the ownership structure of The Vanguard Group, Inc., in the United States. Rather than being publicly traded or owned by a small group of individuals, The Vanguard Group is owned by Vanguard's U.S.-domiciled funds and ETFs. Those funds, in turn, are owned by their investors.

How our ownership structure generates benefits for clients

This unique mutual structure aligns our interests with those of our investors and drives the culture, philosophy and policies throughout the Vanguard organization worldwide. As a result, investors in the Americas benefit from Vanguard's stability and experience, low costs, and client focus.

How we aim to serve

Vanguard's flywheel: Our aspiration in serving our clients.

Vanguard Mexico may recommend products of The Vanguard Group Inc. and its affiliates

and such affiliates and their clients may maintain positions in the securities recommended by Vanguard Mexico. ETF Shares can be bought and sold only through a broker and cannot be redeemed with the issuing fund other than in very large aggregations. Investing in ETFs entails stockbroker commission and a bid-offer spread which should be considered fully before investing. The market price of ETF Shares may be more or less than net asset value. All investments are subject to risk, including the possible loss of the money you invest. Investments in bond funds are subject to interest rate, credit, and inflation risk.

Governmental backing of securities apply only to the underlying securities and does not prevent share-price fluctuations. High-yield bonds generally have medium- and lower-range credit quality ratings and are therefore subject to a higher level of credit risk than bonds with higher credit quality ratings.

There is no guarantee that any forecasts made will come to pass. Past performance is no guarantee of future results. Prices of mid- and small-cap stocks often fluctuate more than those of large-company stocks.

Funds that concentrate on a relatively narrow market sector face the risk of higher share-price volatility. Stocks of companies are subject to national and regional political and

economic risks and to the risk of currency fluctuations, these risks are especially high in emerging markets. Changes in exchange rates may have an adverse effect on the value, price or income of a fund.
